thaamba

[Event name] 2026

[Old way] has stopped working. [New way] starts here.

TEAM	TRACK	PRESENTING
[Team name]	[Challenge track]	[Speaker name]

[Pain point]? Every [week], [who] lose [quantified loss].

WHO HURTS

[Primary user]

One line on who feels this pain most, and how often.

WHEN IT HAPPENS

[Trigger moment]

The exact moment things break, in their words.

TODAY'S WORKAROUND

[Current fix]

Why the existing fix is slow, costly, or ignored.

00%

Left unsolved, it costs [amount] every [period].

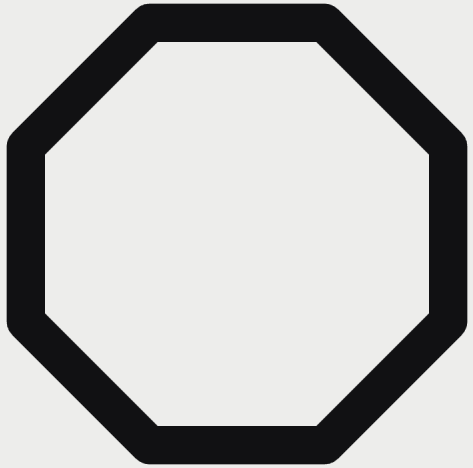

Use one number that carries the argument. Everything else on this slide supports it.

SOURCE · [PUBLICATION, YEAR] · [UNIT, TIME RANGE]

03

The solution

From [status quo] to [goal], thaamba is the path.

BEFORE

[What it's like today]

- [Friction point one]
- [Friction point two]
- [Friction point three]

WITH THAAMBA

[What it's like with you]

- [Outcome one]
- [Outcome two]
- [Outcome three]

Three steps from [trigger] to [outcome].

01

[Detect]

What thaamba watches for, and where the signal comes from.

02

[Decide]

The moment it steps in. Name the model, rule, or API.

03

[Deliver]

What the user sees, and what they no longer have to do.

Watch it [core action] in one click.

1. **[Screen one]**
   What the judge should notice here.

2. **[Screen two]**
   The moment the magic happens.

3. **[Screen three]**
   The result, in the user's hands.

Built and shipped in 48 hours.

WORKING FEATURES	COMMITS	INTEGRATIONS	TEST USERS
00	00	00	00
End-to-end, demo-ready.	Across [n] contributors.	APIs, models, or data sources.	Who tried it during the event.

Next: from hack to [pilot] in 12 weeks.

NOW

Hackathon build

Working prototype, demoed live.

WEEK 2

[Milestone]

One line on what ships.

WEEK 6

[Milestone]

One line on what ships.

WEEK 10

[Milestone]

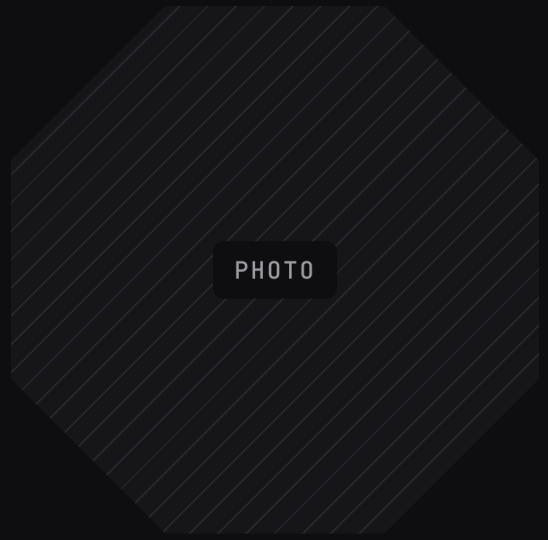

One line on what ships.

WEEK 12

[Pilot live]

With [first partner].

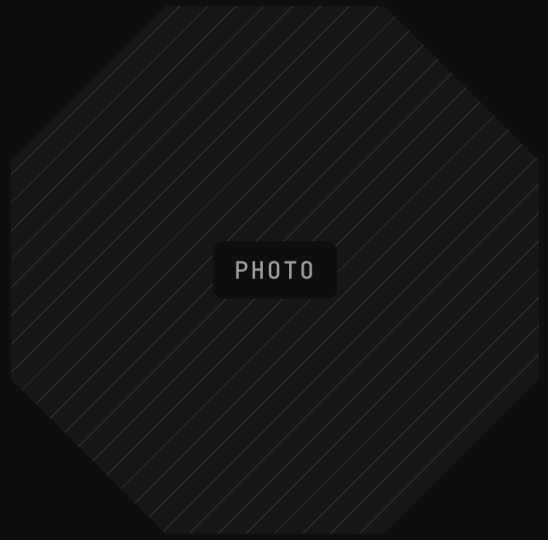

Four builders, [one shared obsession].

[Name]

[ROLE]

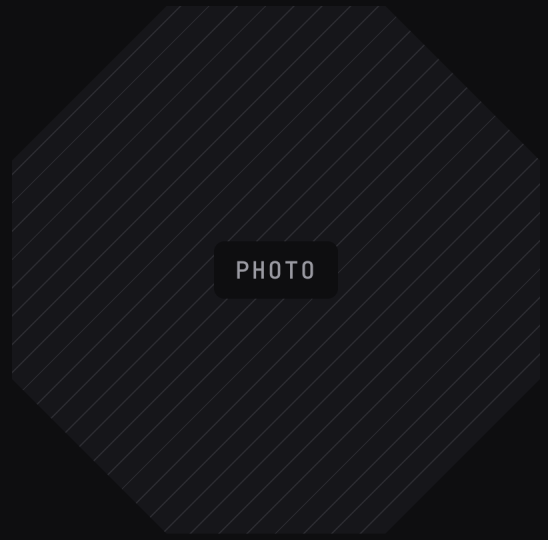

Built [what they built].

[Name]

[ROLE]

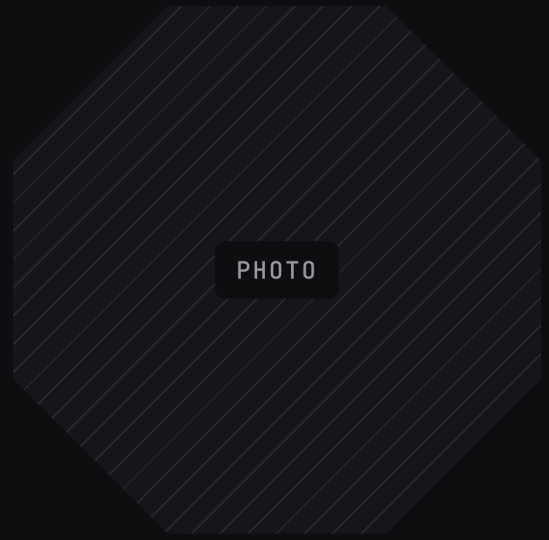

Built [what they built].
